

SUMMER PROGRAMS 2009

SELECTING A SUMMER PROGRAM

There is no question that academic summer programs are the closest approximation to college life for high school students. Academic programs are great for students who are bored by high school classes but intrigued by learning. You can expand your pre-college resume; improve skills in athletics, music or the arts; visit new and exciting locations in this country or around the world. Students will make friends and foster relationships while increasing their confidence and building social skills. For students looking to indulge a passion, a curiosity, or an eagerness to expand his or her intellectual horizons, an academic program is one of the best ways to spend summer vacation!

PRE-COLLEGE PROGRAMS

See your counselor for applications or more information
